

Your inquiry about "CA Proposition 65" for Almeco S.p.A products

Dear valued customer,

Thank you for your inquiry regarding Almeco S.p.A compliance with California Proposition 65, formerly known as the "Safe Drinking Water and Toxic Enforcement Act of 1986", which was enacted as a ballot initiative in November 1986. The proposition helps protect the state's drinking water sources from being contaminated with approximately 1000 chemicals known to cause cancer, birth defects or other reproductive harm ("Proposition 65 Substances"), and requires businesses to inform Californians about exposures to Proposition 65 Substances.

Almeco S.p.A does not typically manufacture or market consumer products. Consumer products are defined as products for the personal use, consumption or enjoyment of a consumer. Hence our products are out of scope of this regulation.

Anyway, non one of the wide range of naturally occurring and synthetic chemicals enclosed in the "Proposition 65 List", are present in the the products supplied in concentration higher than the maximum values allowed by RoHS regulation.

We trust that this letter will answer your questions. Should you require further information, please contact your local Almeco S.p.A Sales Office (see www.almecogroup.com for contact information).

With kind regards,

Giovanni Castelli
General Manager
